Training with the Exuby Shock Collar

Using the Exuby Shock Collar effectively requires understanding how to implement training techniques. Here are some guidelines to follow:

Establish Clear Commands

1. Choose Commands: Decide on clear commands you will use consistently, such as "sit," "stay," or "come."
2. Consistency is Key: Use the same command for the same behavior every time to avoid confusing your dog.

Start with Low Stimulation

1. Begin at the Lowest Level: Start training with the lowest stimulation level to gauge your dog's sensitivity.
2. Observe Your Dog's Reaction: Monitor how your dog responds to the stimulation. If they do not react, gradually increase the level.

Positive Reinforcement

1. Pair Stimulation with Commands: Use the remote to issue a command, and if your dog obeys, reward them with praise or treats.
2. Avoid Overuse: Do not rely solely on the shock collar. Use positive reinforcement techniques alongside it for the best results.

Short Training Sessions

1. Keep Sessions Brief: Limit training sessions to 10-15 minutes to prevent overwhelming your dog.
2. Use Multiple Sessions: Conduct several short sessions throughout the day for consistent training.

Safety Considerations

While the Exuby Shock Collar can be an effective training tool, safety should always be a priority. Here are some important considerations:

1. Never Leave the Collar on for Extended Periods: Avoid leaving the collar on your dog for more than 12 hours to prevent skin irritation.
