Understanding the Fayleeko Key Lock Box

The Fayleeko key lock box is designed to provide a secure and convenient method for storing keys. It is especially useful for real estate agents, property managers, or individuals who require shared access to keys without compromising security. This lock box typically features a durable metal construction and a combination lock mechanism, offering peace of mind against unauthorized access.

One of the key benefits of the Fayleeko lock box is its ability to store multiple keys securely. Users can easily share access with family members, friends, or service providers, ensuring that everyone can retrieve keys when necessary. Additionally, its weather-resistant design makes it suitable for outdoor use, allowing it to withstand various environmental conditions.

Installation Instructions

Choosing the Right Location

Before installation, it is crucial to select an appropriate location for your lock box. Consider these factors:

- **Visibility:** Choose a location that is discreet yet accessible to authorized users.
- **Protection:** Ensure the area is sheltered from extreme weather conditions.
- **Stability:** The surface should be firm enough to securely mount the lock box.

Mounting the Lock Box

Once you have chosen a location, follow these steps to mount the lock box:

1. **Gather the necessary tools:** You will need a drill, screws, and a screwdriver.
2. Use a level to mark the position of the lock box on the wall.
3. Drill holes into the marked spots, ensuring they are the correct depth for the screws.
4. Align the lock box with the drilled holes and secure it with screws.

Make sure the lock box is firmly attached to prevent it from being easily removed or tampered with.

Setting Up Your Lock Box

Understanding the Combination Lock

The Fayleeko key lock box typically utilizes a combination lock mechanism. Familiarize yourself with how it operates to ensure smooth access to your keys. The lock box will come with a preset combination that you should change upon installation for added security.

Changing the Combination

To change the combination, follow these steps:

1. Open the lock box using the current combination.
2. Locate the reset button inside the box.

3. Press the reset button and hold it while setting your new combination.
4. Release the reset button and test the new combination to ensure it works.

Changing the combination regularly is recommended to enhance security and ensure that only authorized users have access.

Troubleshooting Common Issues

Locked Out Scenarios

Occasionally, users may find themselves locked out of their Fayleeko key lock box. Here are some potential solutions:

- **Double-check the combination:** Ensure you are entering the combination correctly, including any necessary pauses between numbers.
- **Inspect the lock mechanism:** Dirt or debris may affect the lock's functionality. Clean the lock gently with a soft cloth.
- **Contact customer support:** If you are still unable to access the lock box, reach out to Fayleeko's customer service for assistance.

Physical Damage

In cases where the lock box has been physically damaged, consider the following:

- **Assess the damage:** Determine if the lock mechanism is broken or if the box is dented.
- **Replace parts:** If the lock is damaged, check with the manufacturer for replacement parts.
- **Consider a new unit:** If the box is severely damaged, it may be more practical to purchase a new lock box.

Maintenance Tips

Regular Cleaning

To extend the lifespan of your Fayleeko key lock box, regular maintenance is vital. Cleaning the exterior and the lock mechanism can prevent issues over time. Use a damp cloth to wipe the surface and ensure no dirt accumulates in the lock area.

Lubricating the Lock

Applying a silicone-based lubricant to the lock mechanism can help it function smoothly. This should be done every few months or if you notice any resistance when opening or closing the lock box.
