## Setting Up Your GE Universal Remote 33712

Getting started with your GE Universal Remote 33712 requires a few straightforward steps. Here's how to set it up effectively:

### Step-by-Step Setup Guide

1. Insert Batteries:
  - Open the battery compartment located on the back of the remote.
  - Insert two AAA batteries, ensuring the positive and negative ends are aligned correctly.
  - Close the compartment securely.
2. Identify Your Devices:
  - Make a list of the devices you want to control, including the brand names and model

numbers.

### 3. Programming the Remote:

#### - Method 1: Manual Code Entry:

1. Turn on the device you want to program (e.g., TV).
2. Press and hold the "Setup" button until the red indicator stays on, then release the "Setup" button.
3. Press the device button for the device you're programming (TV, DVD, etc.). The red indicator blinks and then turns off.
4. Enter the code for your device (found in the code list). The red indicator blinks and turns off if the code is entered correctly.
5. Test the remote by pressing the "Power" button. If the device turns off, the programming is successful.

#### - Method 2: Code Search:

1. Turn on the device you want to program.
2. Press and hold the "Setup" button until the red indicator stays on, then release the "Setup" button.
3. Press the device button (TV, DVD, etc.). The red indicator blinks and turns off.
4. Press and release the "Power" button repeatedly until the device turns off. This may take several attempts.
5. Once the device turns off, press the "Enter" button to store the code.

4. Repeat for Additional Devices: Follow the same steps for each additional device you wish to program.

## Troubleshooting Common Issues

Even with a reliable remote like the GE Universal Remote 33712, users may occasionally face challenges. Here are some common issues and their troubleshooting solutions:

### Remote Not Working

- Check Batteries: Ensure the batteries are installed correctly and are not dead. Replace them if necessary.
- Device Not Responding: Confirm that the device you are trying to control is powered on and functioning properly.
- Reprogram the Remote: If the remote is not controlling the device, try reprogramming it using the steps outlined above.

### Device Codes Not Found

- Consult the Code List: Make sure you are using the correct code list provided in the manual. Codes can vary based on brand and model.
- Use Code Search: If manual entry fails, try the code search method to find the correct

code.

## **Buttons Not Responding**

- Inspect for Damage: Look for any visible damage to the buttons. If a button appears stuck or unresponsive, gently press it multiple times.
- Reset the Remote: Remove the batteries, press all buttons to discharge any remaining power, and then reinsert the batteries.
