Common Repairs and Maintenance Tasks

Here are some common tasks that Yukon XL owners may find themselves performing:

1. Oil Change

Performing an oil change is crucial for engine longevity. Here's a quick guide:

- Gather necessary tools (socket set, oil filter wrench, oil catch pan).
- Remove the drain plug and let the old oil drain completely.
- Replace the oil filter.
- Reinstall the drain plug and fill the engine with new oil.

2. Brake Pad Replacement

Replacing brake pads is essential for maintaining braking efficiency:

- Lift the vehicle and remove the wheels.
- Disconnect the caliper and slide it off the rotor.
- Remove old pads and install new ones.
- Reassemble the caliper and wheels.

3. Tire Rotation

Regular tire rotation helps in even tire wear:

- Lift the vehicle using a jack.
- Remove the tires and rotate them according to the recommended pattern (e.g., front to back, side to side).
- Reinstall the tires and lower the vehicle.
