Understanding the GRE

The GRE is divided into three main sections:

1. **Verbal Reasoning:** This section assesses your ability to analyze written material, understand the structure of arguments, and interpret information presented in various forms. It includes reading comprehension, text completion, and sentence equivalence questions.
2. **Quantitative Reasoning:** This part evaluates your mathematical skills and understanding of basic concepts, as well as your ability to reason quantitatively. It covers arithmetic, algebra, geometry, and data analysis.
3. **Analytical Writing:** In this section, test-takers must write essays that analyze an argument or present a coherent and well-structured argument of their own.

The GRE is scored on a scale of 130 to 170, with separate scores for each of the Verbal and Quantitative sections ranging from 130 to 170, and a separate score for Analytical Writing ranging from 0 to 6.

- **Familiarization:** Taking practice tests allows students to become familiar with the test format, types of questions, and timing, reducing anxiety on test day.
- **Identifying Strengths and Weaknesses:** Practice tests help students identify areas where they excel and areas that require further study, allowing for a more tailored study plan.
- **Building Test-Taking Strategy:** Regular practice under timed conditions helps students develop strategies for pacing and managing time effectively during the actual test.
