What Are Helping Verbs?

Helping verbs, or auxiliary verbs, are verbs that assist the main verb in a sentence by extending its meaning. They help convey time, mood, and voice, making them essential for clear and effective communication. In English, the most common helping verbs include:

- Be (am, is, are, was, were, being, been)
- Have (have, has, had, having)
- Do (do, does, did, doing)
- Modal verbs (can, could, may, might, must, shall, should, will, would)

For example, in the sentence "She is running," the helping verb "is" works with the main verb "running" to indicate the present continuous tense.
