This annual multi-stage bicycle race is not just a test of physical capability but also a celebration of the French landscape, culture, and the spirit of competition.

Origins of the Tour de France

The Tour de France was born out of a desire to promote the newspaper L'Auto, which was struggling to compete with its rival, Le Vélo. In 1903, the newspaper's editor, Géo Lefèvre, proposed a long-distance bicycle race across France to boost circulation. The first race took place from July 1 to July 19, and it consisted of six stages covering a total distance of 2,428 kilometers (1,508 miles).

The Inaugural Race (1903)

The inaugural Tour de France featured a total of 60 cyclists, but only 21 completed the race. The stages were arduous, often leading through challenging terrains and requiring riders to sleep in makeshift accommodations. The first winner was Maurice Garin, who completed the race in 94 hours and 33 minutes. His victory helped to boost L'Auto's circulation dramatically, setting a precedent for future races.
