Installation Process

Installing the Holosun EPS Carry is a straightforward process, but it's important to follow the steps carefully to ensure proper function. Here's how you can install your sight:

Tools Required

- A flathead screwdriver
- A Torx driver (specific to your firearm)
- A clean cloth or gun cleaning mat

Steps for Installation

1. **Clear Your Firearm:** Ensure the firearm is unloaded and pointed in a safe direction.
2. **Prepare the Mounting Surface:** Clean the area where the sight will be mounted to ensure a good fit.
3. **Align the Sight:** Position the Holosun EPS Carry on the mounting plate, ensuring that it is aligned with the bore of the firearm.
4. **Screw It Down:** Use the appropriate screws to secure the sight in place, ensuring they are tightened but not over-tightened to avoid damage.
5. **Check for Stability:** Once installed, gently wiggle the sight to ensure

it's secure.

Adjusting the Holosun EPS Carry

Once installed, you may need to make some adjustments to optimize your shooting experience. Here are the two main types of adjustments you can make:

Windage and Elevation Adjustments

These adjustments allow you to fine-tune your point of aim:

- Windage Adjustment: This controls the horizontal alignment of the reticle. To adjust, locate the windage adjustment screw (usually marked with 'W'). Turn the screw clockwise to move the point of impact right and counterclockwise to move it left.
- Elevation Adjustment: This controls the vertical alignment of the reticle. Locate the elevation adjustment screw (usually marked with 'E'). Turn clockwise to raise the point of impact and counterclockwise to lower it.

Brightness Settings

The Holosun EPS Carry comes with multiple brightness settings. To adjust the brightness:

1. Press the brightness adjustment button (usually marked with a '+' for increase and '-' for decrease).
2. Hold the button for a few seconds to cycle through the different brightness levels.

Battery Replacement

To ensure your Holosun EPS Carry functions optimally, regular battery checks and replacements are crucial. Here's how to do it:

Steps for Battery Replacement

1. **Prepare Your Work Area:** Ensure you are in a clean, well-lit area.

2. **Remove the Sight:** If applicable, remove the sight from your firearm for easier access.
3. **Locate the Battery Compartment:** The battery compartment is usually located on the side or bottom of the sight.
4. **Open the Compartment:** Use a small coin or screwdriver to open the compartment cover.
5. **Replace the Battery:** Remove the old battery and insert the new CR1632 battery, ensuring the polarity is correct.
6. **Close the Compartment:** Securely close the battery compartment cover.

Maintenance Tips

Proper maintenance will extend the life of your Holosun EPS Carry. Here are some essential maintenance tips:

- **Regular Cleaning:** Use a soft cloth to clean the lens and body of the sight. Avoid using harsh chemicals that may damage the finish.
- **Check for Looseness:** Periodically check the mounting screws to ensure they remain tight.
- **Store Properly:** When not in use, store your firearm in a safe, dry place to prevent moisture and dust build-up.
