## **Step-by-Step Instructions to Make Italian Ice in Pakka Pets**

Follow these steps to create your delicious Italian ice using Pakka Pets:

### **Step 1: Prepare the Fruit**

- Start by washing your chosen fruit thoroughly. If you are using fresh fruit, ensure it's ripe and sweet.
- For fruits like strawberries or peaches, hull or pit them as necessary.
- Cut the fruit into smaller pieces to make blending easier.

### **Step 2: Make the Base Mixture**

1. Blend the Ingredients:

- Place the prepared fruit in a blender.
- Add the desired amount of sugar (start with 1/2 cup) and a cup of water.
- If using lemon juice, add 2-3 tablespoons to enhance the flavor.
- Blend the mixture until smooth. If it's too thick, you can add a bit more water.

2. Taste and Adjust:

- Taste the mixture. If it's not sweet enough, add more sugar and blend again.
- If you want a more intense flavor, consider adding more fruit or a splash of lemon juice.

### **Step 3: Pour into Pakka Pets Molds**

- Carefully pour your blended mixture into the Pakka Pets ice molds.
- Leave a little space at the top of each mold, as the mixture will expand when frozen.
- If desired, you can sprinkle some additional fruit bits on top for added texture.

### **Step 4: Freeze the Mixture**

- Place the filled molds in the freezer.
- Allow them to freeze for at least 4 to 6 hours, or until completely solid.
- For best results, you can leave them overnight.

### **Step 5: Unmold and Serve**

- Once your Italian ice has frozen solid, remove the molds from the freezer.
- To loosen the ice, run warm water over the outside of the molds for a few seconds.
- Gently squeeze or pull the mold to release the Italian ice shapes.
- Serve immediately or store in a freezer-safe container for later enjoyment!

### **Tips for Perfect Italian Ice**

- Use Fresh Ingredients: Fresh fruits will yield better flavors compared to canned or frozen ones.
- Experiment with Flavors: Don't hesitate to mix different fruits or add herbs like basil or mint for a unique twist.
- Adjust the Sugar: The sweetness of fruits can vary, so adjust the sugar according to your taste preferences.
- Avoid Over-blending: While it's important to blend until smooth, over-blending can introduce

unwanted air, making the texture less desirable.

## Healthier Alternatives

For those looking for a healthier version of Italian ice, consider these alternatives:

- Reduce Sugar: Use natural sweeteners like honey or agave syrup.
- Use Coconut Water: Instead of plain water, using coconut water can add flavor and hydration.
- Incorporate Vegetables: Blend in spinach or kale with fruits for added nutrients without significantly altering the flavor.
