Choose a spacious area to work on your bed assembly. It is advisable to lay down a soft blanket or mat to protect the bed components from scratches. Make sure you have ample lighting to help you see clearly during the assembly process.

Step 2: Assemble the Bed Frame

1. Lay Out the Frame Pieces: Start by laying out the side rails, headboard, and footboard. Identify the front and back for each component.
2. Attach the Side Rails: Use the screws provided in the hardware pack to attach the side rails to the headboard and footboard. Ensure that the pre-drilled holes align properly.
3. Secure All Connections: Tighten all screws securely but be careful not to overtighten, as this may damage the wood.

Step 3: Install the Slatted Bed Base

1. **Position the Slats:** The Sultan Lade bed features a slatted base that provides support for the mattress. Lay the slats across the bed frame, ensuring they are evenly spaced.
2. **Secure the Slats:** Some models may require you to secure the slats with screws or a support system. Follow the specific instructions for your model for this step.
