Key Maintenance Practices for the Janome 622

Proper maintenance is crucial for ensuring your Janome 622 sewing machine operates smoothly. Here are some key practices you should follow:

1. Regular Cleaning

- Remove lint and dust: After each sewing session, use a soft brush or a vacuum attachment to remove lint and dust from the machine, especially around the feed dogs and bobbin area.
- Clean the needle plate: Remove the needle plate to clean any debris that may have accumulated.

2. Oiling the Machine

- Consult your manual for specific oiling instructions. Typically, you should oil the machine every few months or as needed.
- Use only sewing machine oil, and avoid over-oiling, as this can attract more dust and lint.

3. Checking Thread Tension

- Regularly check and adjust the thread tension as needed, especially when switching between different fabrics or threads.

4. Changing the Needle

- Replace the needle regularly to ensure clean and even stitching. A good rule of thumb is to change it

after every 8-10 hours of sewing.

Troubleshooting Common Issues with the Janome 622

Despite proper maintenance, you may still encounter some issues while using your Janome 622. Here are some common problems and how to troubleshoot them:

1. Thread Bunching

- Check threading: Ensure the machine is threaded correctly, including the bobbin.
- Adjust tension: If the upper thread tension is too tight, it can cause bunching. Adjust it accordingly.

2. Uneven Stitches

- Check needle: A bent or dull needle can cause uneven stitches. Replace it if necessary.
- Fabric choice: Make sure you are using the appropriate needle and thread for the type of fabric.

3. Machine Not Sewing

- Check power supply: Ensure the machine is plugged in and the power switch is turned on.
- Inspect foot pedal: Make sure the foot pedal is functioning correctly and connected properly.
