This comprehensive guide will walk you through everything you need to know about the JBL Tune 660, from setup and features to troubleshooting and maintenance.

Getting Started with Your JBL Tune 660

Before diving into the features and functionalities, it's important to understand how to get started with your JBL Tune 660 headphones. The user manual provides essential information that can enhance your experience.

Unboxing the JBL Tune 660

When you first open the box, you should find the following items:

- JBL Tune 660 headphones
- USB charging cable
- 3.5mm audio cable
- User manual
- Warranty card

Ensure that all items are present before proceeding to the next steps.

Charging Your Headphones

To use your JBL Tune 660 headphones, you must first charge them. Follow these steps:

1. Connect the USB charging cable to the headphones and a power source.
2. Allow the headphones to charge for at least 2 hours for a full charge.
3. The LED indicator will show red while charging and turn off once fully charged.

Connecting the JBL Tune 660 Headphones

Once your headphones are charged, you can connect them to your devices. The JBL Tune 660 headphones offer both wired and wireless connectivity options.

Wireless Connection via Bluetooth

To connect your headphones wirelessly:

1. Turn on the headphones by pressing the power button.
2. Enable Bluetooth on your device (smartphone, tablet, etc.).
3. Look for "JBL Tune 660" in the list of available devices and select it.
4. Once connected, you will hear a confirmation sound.

Wired Connection

For a wired connection, simply connect the 3.5mm audio cable to the headphone jack on your device and the other end to the headphones. This is especially useful for devices without Bluetooth capability or when battery life is a concern.

Troubleshooting Common Issues

Even the best devices can encounter issues. Here are some common problems and solutions you might find in the JBL Tune 660 manual.

Headphones Won't Connect

If you are having trouble connecting your headphones via Bluetooth:

- Ensure that the headphones are charged.
- Make sure Bluetooth is enabled on your device.
- Delete any existing pairings of the headphones on your device and try reconnecting.

Sound Quality Issues

If you experience sound quality problems:

- Check if the headphones are fully charged.
- Ensure that the audio source is playing at a good volume.
- Test with different devices to confirm if the issue is with the headphones or the audio source.

Battery Not Lasting as Long

If you notice that the battery life is shorter than expected:

- Check if any background applications are using Bluetooth.
- Ensure that you are turning off the headphones when not in use.
- Keep the headphones updated with the latest firmware if applicable.

Maintaining Your JBL Tune 660 Headphones

Proper maintenance can prolong the life of your JBL Tune 660 headphones. Here are some tips:

Cleaning Your Headphones

- Use a soft, dry cloth to wipe the exterior.
- Avoid using harsh chemicals or solvents.
- Clean the ear cushions periodically with a damp cloth and mild soap, ensuring they are dry before using again.

Storing Your Headphones

- Store your headphones in a cool, dry place when not in use.
- Use the carrying pouch (if provided) to protect them from dust and scratches.
